JULIE RIGGS

OFFICE MANAGER

As Office Manager, Julie helps keep everything running smoothly behind the scenes so our patients always have a great experience at Holzapfel & Lied.

FAVORITE THING ABOUT HOLZAPFEL & LIED

"What I love most about coming to work is that no two days are ever the same. One day I might be in Edgewood, the next in Kenwood – with different coworkers, responsibilities, and experiences. It keeps things exciting, and I genuinely look forward to each day!"

FAVORITE ÉTAGE PROCEDURE

SkinPen Microneedling

HOW SUN IMPACTS YOUR SKIN

Too much sun exposure can damage your skin over time. The sun's UV rays trigger your skin to produce more melanin, which can lead to dark spots or uneven pigment. These rays also break down collagen and elastin—the proteins that keep your skin firm and smooth—leading to fine lines and wrinkles. Even short periods in the sun without protection can add up and cause visible signs of aging.

To help reverse sun damage, start by wearing sunscreen daily to prevent further harm. Using products with retinol and vitamin C can improve skin texture and fade dark spots. Gentle exfoliation or chemical peels help renew the skin's surface, while moisturizing keeps it healthy and hydrated. For deeper damage, treatments like laser therapy can boost collagen and even out pigmentation.
